

Megaphone Hanger Template

1. Sublimate product and let it cool PRIOR to applying hanger.
2. Cut out the rectangle in the center of the drawing and the appropriately sized megaphone drawing.
3. Place the template over the back of the megaphone and align the edges.
4. Remove white release paper from hanger. Do NOT touch the adhesive area after removing the white release paper.
5. Place your hanger on the megaphone inside of the rectangle and press firmly on the adhesive-backed area of the hanger. Use the rounded end of a pen cap or permanent marker cap to burnish the adhesive-backed area to ensure good adhesion.
6. DO NOT attempt to reposition this hanger once it has been applied — it will not have good adhesion if it is repositioned.
7. Allow hanger adhesive to cure for 24 hours before use.
