

PrintMe-Balloons!™ Assembly

1

Carefully tear out the balloon along the dotted lines.

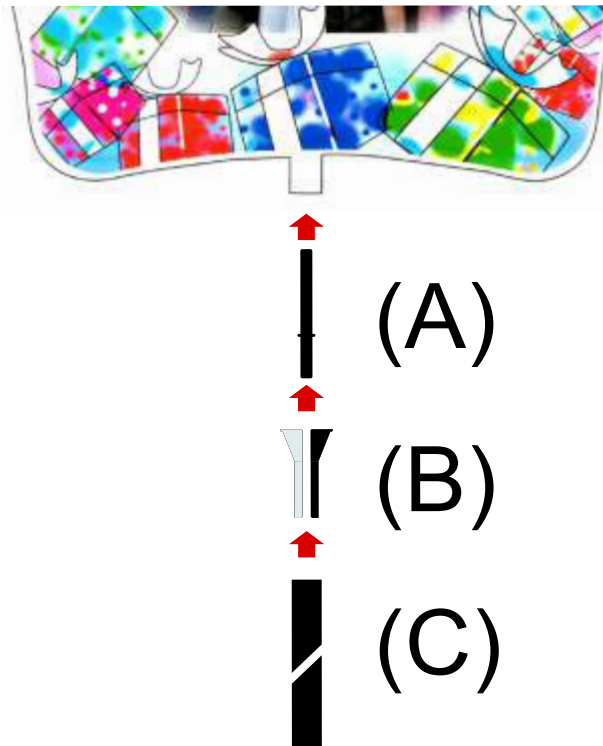

2

(A) Insert the small tube into the balloon (long end first) so the paper is flush with the tube end.

(B) Place the two plastic “cups” around the insert tube, so that the notches line up with the tube’s

(C) Insert the long straw over the “cups”, making sure it is a clean fit.

3

Blow up the balloon using the open end of the long straw. Air may be added later, if needed.

If using the optional balloon base, insert it now.
