

Vapor Apparel Launches **PURE-tech** wicking technology into its Garments.

Vapor Apparel is introducing an innovative technology that offers the best performance features in a unique line of premium printable fabrics.

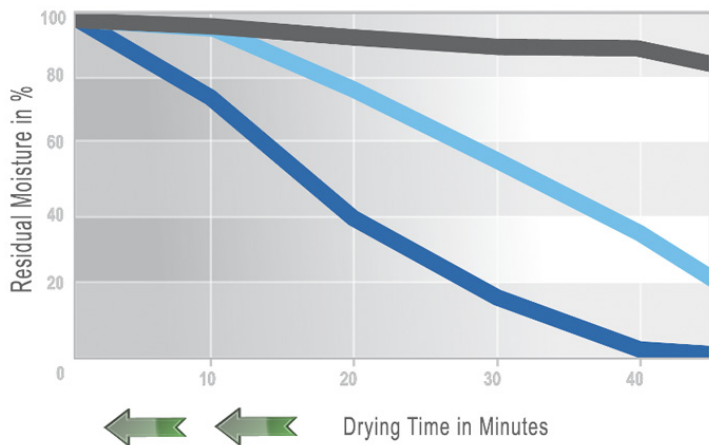

PURE·techTM wicking technology

PURE - tech is developed to enhance the experience every time you put on Vapor Apparel.

PURE - tech delivers maximum performance in every way:

- Drying rapidly - Increasing surface migration and evaporation.
- Reducing Static - Creating comfort and enhancing look and fit.
- Minimizing Stains - Extending the life of the garment.
- Wicking Permanently - Delivering long-term comfort year after year.
- Existing Sustainably - Through a reduced manufacturing process.
- Resisting Microbes - Protecting the body from illness.
- Improved UPF Protection

Surface Evaporation Test

10 times washed at 40°C

Testing conditions: 20°C

65% air humidity

Conventional Polyester

Standard Wicking Polyester

Pure-tech Wicking Technology

Washing conditions : ISO 6330 / 40°C

Gentle Program

Tumble Dried

Moisture Management at its highest performance level!

Functional Fabrics, Functional Finish
